Read the following passage, and choose the correct answer to each of the questions

A rather surprising geographical feature of Antarctica is that a huge freshwater lake ,one of the world's largest and deepest , lies **hidden** there under four kilometers of ice .Now known as Lake Vostok, this huge body of water is located under the ice block that comprises Antarctica . The lake is able to exist in its unfrozen state beneath this blockof ice because its waters are warmed by geothermal heat from the earth's core .The thick glacier above Lake Vostok actually insulates it from the **frigid** temperatures on the surface .

The lake was first discovered in the 1970s while a research teamwas conducting an aerial survey of the area .Radio waves from the survey equipment penetrated the ice and revealed a body of water of indeterminate size.It was not until much more recently that data collected by satellite made scientists aware of the tremendous size of the lake ; the satellite –borne radar detected an extremely flat region where the ice remains level because it is floating on the water of the lake .

The discovery of such a huge freshwater lake trapped under Antarctica is of interest to the scientific community because of the potential that the lake contains ancient **microbes** that have survived for thousands upon thousands of years, unaffected by factors such as nuclear fallout and elevated ultraviolet light that have affected organism in more exposed areas .The **downside** of the discovery,however, lies in the difficulty of conducting research on the lake in such a harsh climate and in the problems associated with obtaining uncontaminated samples from the lake without actually exposing the lake to contamination . Scientists are looking for possible way to accomplish this.

Read the following passage, and choose the correct answer to each of the questions

In order to learn to be one's true self, it is necessary to obtain a wide and extensive knowledge of what has been said and done in the world: critically to inquire into it, nearly to sift it, and earnestly to carry it out. It matters not what you learn, but when you once learn a thing, you must never give it up until you have mastered it. It matters not what you inquire into, but when you inquire into a thing, you must never give it up until you have completely understood it. It matters not what you try to think out, but when you once try to think out a thing, you must never give it up until you have got what you want. It matters not what you try to sift out, but you once try to sift out a thing, you must never give it up until you have sifted it out clearly and distinctly. It matters not what you try to carry out, but when you once try to carry out a thing, you must never give it up till you have done it completely and well. If another man succeeds by one effort, you will use a hundred efforts. If another man succeeds by ten efforts, you will use a thousand efforts.
