PART 1. Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the following questions from 19 to 24. (1.2 points) 180-200w

Living Without a Smartphone

Craig, 15, used to be on social media 24/7, but when his smartphone broke, he chose not to replace it. Surprisingly, he felt better. While others constantly check their phones, Craig spends his time doing things he enjoys. He still hangs out with friends in person and stays busy with singing, dancing, and designing clothes. He uses his laptop for school and creative work, proving that life without a smartphone can still be full and connected.

Another teen shared how he lost his phone months ago. At first, it was difficult, but later, he didn't miss it. He realized he didn't care about likes or trends and preferred thinking differently. For him, phones shouldn't be the center of entertainment. He now enjoys skateboarding, playing guitar, and writing songs. He believes social media is boring and finds face-to-face time with friends more meaningful.

Both teenagers show that living without a smartphone is not the end of the world. In fact, it can be freeing and more creative. They suggest that if you turn off your phone today, you won't lose your friends—you might just gain a better life.

Learning English with Electronic Devices

Using electronic devices to learn English offers many advantages. First, they are portable and can be used anywhere. This means you can study English on the bus, in a café, or even in bed.

Second, there is a wide range of apps and websites that provide interactive activities and exercises. These tools can make learning more interesting and fun. For instance, you can practise your listening skills by watching videos or listening to podcasts. You can also play games that help improve your vocabulary and grammar.

Another benefit is that electronic devices give you access to online dictionaries and translation tools. These are very useful when you come across a new word or phrase you don't understand.

Finally, electronic devices make it easier to connect with other learners and native English speakers. You can join online communities, take part in discussions, or find language exchange partners. These are great ways to practise speaking and writing skills.

In conclusion, electronic devices can be helpful tools for learning English. However, it's important to use them wisely and not depend on them too much.

OUTLINE

Introduction:

What your favourite electronic device is.

Body:

- What it can do now (list 2–3 current functions).
- What it will be able to do in the future (predict 2–3 future features).

Conclusion:

Why you love it / Why it's important to you.

Writing sample (Suggested Answer):

My favourite electronic device is my tablet. Right now, it helps me do many things like reading e-books, taking online classes, and watching English videos. It's light, easy to carry, and has a long battery life. I also use it to chat with friends, play games, and search for information. In the future, I think my tablet will be even more advanced. It will use artificial intelligence to give me learning advice and help me study faster. I believe it will have a better camera and stronger battery. It may even translate English books into Vietnamese instantly or turn handwriting into typed text. For these reasons, I love my tablet and believe it will become even more useful in the future.
