

## Repaso examen

**Everything around us that takes up space is made up of...**

- a. wood.                                      b. matter.                                      c. water.

**Each type of matter is...**

- a. air.                                          b. an object.                                      c. a substance.

**The amount of matter in objects is called...**

- a. mass.                                      b. volume.                                      c. density.

Repaso examen

**Volume is measured in...**

- a. kilogrammes.                      b. centimetres.                      c. litres.

**Gases...**

- a. have a fixed shape and a fixed volume.  
b. have a fixed volume, but their shape can change.  
c. do not have a fixed shape nor a fixed volume.

### Repaso examen

**There are two types of changes in matter...**

- a. condensation and solidification.
- b. physical and chemical changes.
- c. mixtures and evaporation.

**Contraction is...**

- a. combustion.
- b. a physical change.
- c. a chemical change.

**When the temperature of an object increases...**

- a. it gets bigger. This is called expansion.
- b. it gets smaller. This is called contraction.
- c. it gets bigger. This is called contraction.

## Repaso examen

### **Melting is...**

- a. when a gas is cooled and changes into a liquid.
- b. when a solid is heated and changes into a liquid.
- c. when a liquid is cooled and changes into a solid.

### **When a substance changes into another different substance it is called...**

- a. chemical change.
- b. expansion.
- c. physical change.

## Repaso examen

Label the illustrations.

liquid

gas

solid

A

\_\_\_\_\_

B

\_\_\_\_\_

C

\_\_\_\_\_

### Repaso examen

Which photo shows a chemical change? Tick (✓).

Screwdrivers have a plastic handle and a metal bar. Write which material is the conductor and which material is the insulator.

a) .....

b) .....

### Repaso examen

a. Trace the following sentences.

b. Fill in the blank spaces with the missing words.

Space - volume - matter - substances - mass

Everything around us that takes up \_\_\_\_\_ is made of \_\_\_\_\_. All objects have two properties: \_\_\_\_\_, which is the amount of matter in an object, and \_\_\_\_\_, which is the amount of space an object occupies. The different types of matter are called \_\_\_\_\_.

## Repaso examen

How do you measure mass and volume? Look and match.

mass

volume

### Repaso examen

### Clasifica los materiales

Papel -granito -cristal -madera -cerámica -cuero

Classify the materials.

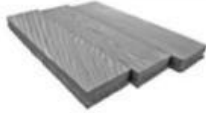

paper

granite

glass

wood

pottery

leather

**Materiales naturales**

**Materiales fabricados por el hombre**

**natural materials**

---

---

---

**man-made materials**
