Read the following passage and choose the correct answer to each question.

NASA, short for the National Aeronautics and Space Administration, is a United States government agency responsible for space exploration and research. Founded in 1958, NASA has played a crucial role in advancing our understanding of space and our universe.

One of NASA's most famous achievements was the Apollo program, which landed astronauts on the moon in 1969. This historic event marked a significant milestone in human history. Since then, NASA has continued to explore space through various missions, including the Mars rover missions. These missions aim to understand the Red Planet better. NASA also operates the International Space Station (ISS), a space laboratory where astronauts from around the world conduct experiments and research. The ISS orbits Earth and provides valuable insights into life in space. Moreover, NASA contributes to studying Earth's climate change, severe weather, and natural disasters. Their satellites monitor changes in our planet, helping us **address** environmental challenges. NASA continues to plan for future missions, including the Artemis program, which aims to return humans to the moon and eventually send astronauts to Mars.

Question 27 (Question ID: 91-673476)

When was NASA established?

- A. In 1985
- B. In 1858
