

What are Earth's climates like?

1. Match each climate zone with its corresponding place on the drawing of the Earth.

HOT CLIMATES

TEMPERATE CLIMATES

COLD CLIMATES

2. Classify the climates. Drag and drop each type of climate into the correct climate zone.

Equatorial	Polar	Tropical	Mediterranean
Oceanic	Desert	Mountain	Continental

HOT CLIMATES	TEMPERATE CLIMATES	COLD CLIMATES

3. Complete the table about climates using the given information.

above 20 °C	irregular and scarce	regular and abundant	regular and very abundant
Scarce	abundant (snow)	above 20°C. Contrast between day and night	very low
very scarce	25 °C	very low in winter cool in summer	Mild in winter High in summer
mild	In one wet season	very low in winter high in summer	mostly in summer

TYPE OF CLIMATE	TEMPERATURE	PRECIPITATION
