

## WHAT ARE LANDSCAPES LIKE IN THE TEMPERATE AND COLD ZONES?

1. Match each landscape with its characteristics. (Drag and drop)

Polar	Oceanic	Mountain	Mediterranean	Continental
-------	---------	----------	---------------	-------------

- Evergreen forests, shrubs like rosemary and thyme, near the Mediterranean

Sea. \_\_\_\_\_.

- Abundant vegetation, deciduous forests, meadows, moorland. \_\_\_\_\_.

- Taiga in cold areas, grasslands and steppes in warmer areas. \_\_\_\_\_.

- Tundra, mosses and lichens, very cold, low population. \_\_\_\_\_.

- Vegetation changes with altitude, includes shrubs, scrub and snow. \_\_\_\_\_.

2. Complete the text (Fill in the gaps). DO NOT USE CAPITAL LETTERS.

altitude	oceanic	grassland	moorland	mediterranean	taiga
----------	---------	-----------	----------	---------------	-------

There are different types of landscapes depending on climate. In \_\_\_\_\_ landscapes, we can find evergreen forests with pines and holm oaks.

In \_\_\_\_\_ landscapes, vegetation includes deciduous forests and areas of \_\_\_\_\_.

In continental landscapes, vegetation varies: in the coldest areas there is \_\_\_\_\_, while \_\_\_\_\_ dominates in warmer regions.

In mountain landscapes, vegetation changes with \_\_\_\_\_.

3. Classify the types of vegetation (Drag and drop into the correct group).

Steppes	Deciduous forest	Tundra	Scrub	Moorland
Grassland	Taiga	Coniferous forest	Mediterranean forest
