

Learning to Adapt - Grade 6 (Level B1)

During the pandemic, many schools around the world had to close their doors and switch to online learning. Maria, a sixth-grade student, found this change challenging. At first, she struggled to focus during virtual lessons and missed seeing her friends. However, with time, she developed a routine. She set a schedule, created a quiet study space, and began asking her teacher more questions. Maria even started a small online group where classmates could help each other with homework. Although she still missed her classroom, Maria learned how to adapt and take responsibility for her learning.
