

EJERCICIOS DE MATEMÁTICA

Ejercicio 1 Aplica la propiedad conmutativa y completa cada ejercicio.

a

$$13 + 127 = 127 + \boxed{}$$

Diagram showing the commutative property of addition. Blue lines connect the numbers 13 and 127 in the first sum to the boxes in the second sum, indicating that the order of the addends can be reversed.

b

$$\boxed{} + 29 = \boxed{} + 233$$

Diagram showing the commutative property of addition. Blue lines connect the boxes in the first sum to the boxes in the second sum, indicating that the order of the addends can be reversed.

c

$$41 + \boxed{} = 227 + 41$$

Diagram showing the commutative property of addition. Blue lines connect the numbers 41 and the box in the first sum to the numbers 227 and 41 in the second sum, indicating that the order of the addends can be reversed.

d

$$61 + \boxed{} = 307 + \boxed{}$$

Diagram showing the commutative property of addition. Blue lines connect the numbers 61 and the box in the first sum to the numbers 307 and the box in the second sum, indicating that the order of the addends can be reversed.
