

Answer the following questions. Remember to follow the structure for the Zero Conditional.

1. If factories **release** dirty smoke into the air, what **happens** to the quality of the air we breathe?

2. When a family **chooses** to walk or bike instead of drive, what **does** it do for the amount of carbon in the atmosphere?

3. If we **sort** our garbage into different bins for recycling and composting, what **does** it mean for the amount of trash that goes to landfills?

4. When farmers **use** too many chemicals on their crops, what **does** it cause for the soil and water nearby?

5. If you **turn off** the lights when you leave a room, what **does** it do for the amount of electricity we use?
