

DOLPHINS: THE INTELLIGENT MARINES

 Did you know dolphins are some of the smartest animals in the world? Let's discover more about them!

Dolphins are mammals. They eat fish and squid.

They can see very well and hear sounds that humans can't. Dolphins use echolocation to find things. They make sounds that bounce back to them.

Some scientists think dolphins can "hear" with their teeth!

Dolphins like to touch each other but they can't smell. They can taste and prefer some fish.

Dolphins make clicks, whistles, and other sounds to "talk". When they get closer to an object, they click faster. Dolphin clicks are very loud!

 Let's dive into the world of dolphins! Complete the sentences with the missing words.

a. Dolphins are _____. They eat _____ and squid.
