

The Riachuelo River - Learning Activity

1. Reading Text

The Riachuelo is a river in Buenos Aires, Argentina. It is small and not very long. Many people live near the river.

In the past, the Riachuelo was clean; people used the water for fishing and washing. Today, the water is dirty. Factories and houses put trash and dirty water into the river.

Now, the government wants to clean the Riachuelo. Some people help; they teach others to take care of the river.

We can help too! We should not throw trash in the street. We should recycle and use less plastic.

The Riachuelo is part of our city. Let's protect it!

2. True or False

- a) The Riachuelo is in Buenos Aires. _____
- b) The river was dirty in the past. _____
- c) People used the river for fishing. _____
- d) Factories clean the river. _____
- e) We should recycle. _____
