

Read and write.

Are computer games good or bad?

What do they think? Write **g** for good and **b** for bad.

1

I like computer games because they are fun and exciting.

2

I think they are unhealthy because they stop children doing exercise.

3

I think they are boring because they repeat the same games.

4

I think they teach important skills. They make children read English, plan actions and work out problems.

5

In my opinion, they can make children do bad things. This is because they are always about guns and driving fast.

6

In my opinion, they are very useful because they stop children getting bored and doing dangerous things.
