

Name: _____

Read each question **carefully**.

Part A.

Click the drop down arrow and select the correct abbreviation for each question. (1 each)

Tablespoon

Gallon

Quart

Teaspoon

Part B Short answer.

Answer all questions below. Points (.)

1. Which part of the recipe includes the measurement of ingredients? (1)

2. Andre decided to make a cake for his mom for her birthday. While preparing the cake, he measured out one cup of flour using a dry measuring cup. After measuring the flour, he

shook off the excess that remained on the top. Later he measured one cup of milk using a liquid measuring cup, on an uneven counter top and then mixed all the ingredients together. After mixing he placed it in the oven to bake and then he later removed it. However, the cake did not turn out as Andre planned.

State two reasons why Andre's cake did not turn out as planned. (1)

State the correct process of what Andre should have done. (1)
