

Sample:

Determine the area of the rectangle

Solution:

$$A = l \times w$$

$$A = (3m \times 18m)$$

$$A = 54 \text{ metre square}$$

1. Following each steps above, Find the area of a rectangle with sides 7.5m by 2.5m

Solution:

$$A =$$

$$A =$$

$$A =$$

Sample

Determine the area of a square with a side length 10 cm.

$$A = l^2$$

$$A = (10 \text{ cm})^2 = 10\text{cm} \times 10\text{cm}$$

$$A = 100 \text{ centimetre square}$$

2. Following each steps above, Find the area of a rectangle with length 8.6cm

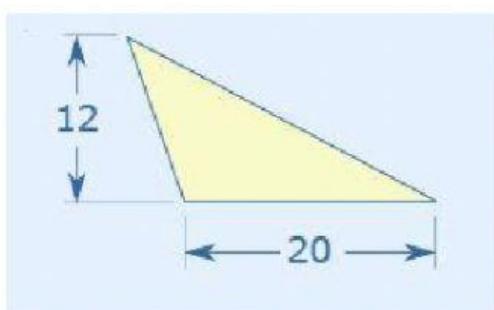

Solution

$$A = \underline{\hspace{2cm}}^2$$

$$A = (\underline{\hspace{2cm}} \text{ cm})^2$$

$$A = \underline{\hspace{2cm}} \text{ centimetre square}$$

Sample:

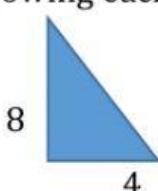

$$\text{Height} = h = 12$$

$$\text{Base} = b = 20$$

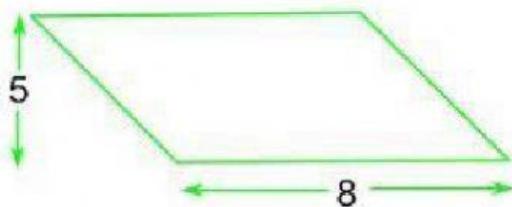

$$\text{Area} = \frac{1}{2} \times b \times h = \frac{1}{2} \times 20 \times 12 = 120$$

Following each steps above, find the area of the triangle below:

$$\text{Area} = \frac{1}{2} \times b \times h = \frac{1}{2} \times \underline{\quad} \times \underline{\quad} = \underline{\quad}$$

Sample

Following each steps above, Find the area of a rectangle

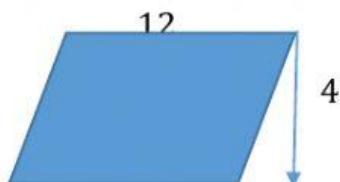

What is the area of the parallelogram?

Solution

$$A = b \times h$$

$$A = 8 \times 5$$

$$= 40 \text{ square unit}$$

Solution

$$A = b \times h$$

$$A = \underline{\quad} \times \underline{\quad}$$

$$= \underline{\quad} \text{ square unit}$$
