STRANGER THINGS

Stranger Things is a science fiction series. It takes place in a small town called Hawkins in the 1980s. The story begins when a young boy named

Will disappears. His friends try to find him.

While searching, they meet a strange girl with special powers. Her name is Eleven.

She escaped from a secret laboratory.

Many strange things happen in the town,

including monsters from another world called the Upside Down. The group of friends must work together to find Will and stop the danger.

The Bicycle Chase Scene

One day, the boys are riding their bikes. They are trying to escape from some men in a van. The men work for the laboratory. They want to take Eleven back. The boys are scared, but they ride fast. The van is very close. Suddenly, Eleven uses her powers. She makes the van fly into the air and crash on the road. The boys are safe. They are surprised and happy. They know Eleven is special and strong. Together, they continue their adventure.

A. Choose the correct answer:
