

Do you remember the story about the Farmer and the Knights and the Dragon and the Fairy and Fang we created with Miss Ingrid last week?

Let's try to put it in order!

A storm came and the knights and the fairy went after the dragon who took the dog to the king's castle. The beast caught one of the knights but the fairy took her magic wand and cast a spell on the dragon and turned it into a chicken. The other knight fought the king and saved Fang. On their way out, they crossed the river.

Finally, at the end of the river there was the farmer waiting for them. They were happy because they were together.

Once upon a time, there was a farmer who had two sons that were knights. The farmer also had a dog called Fang. The family had a fairy who protected it. They lived in a small town near a mountain.

One day, they were exploring in the forest when suddenly a fierce dragon appeared. They all hid behind trees except for Fang who was taken by the green creature.

THE END
