

## Subtraction Of Whole Numbers And Turns

**Q#01:** Look at the given turns carefully. Choose the correct option and tell what type of turns these are.

One quarter turn clockwise / Two quarter turns clockwise

One quarter turn anti-clockwise / One quarter turn clockwise

**Q#02:** Look at the situation given in the missing subtraction mystery box and fill in the missing boxes.

**Solution:**

Number of flowers planted in all =

Number of flowers which are roses =

Number of flowers which are lilies =     
=

Total number of flowers planted	
90	
Number of roses	Number of lilies
56	?

**Q#03:** Look at the given figure carefully. Choose the best option by keeping in the mind the concept of turns.

- (i) After how many quarter turn(s) counter clockwise, arrow will point at cloud?
- (ii) After how many quarter turn(s) clockwise, arrow will point at Sun?
- (iii) After 1 quarter turn counter clockwise, at which figure, arrow will point?
- (iv) After two half turns clockwise, at which arrow will point?

- ( 1 / 2 / 3 )
- ( 1 / 2 / 3 )
- ( moon / star / Sun )
- ( Sun / star / cloud )

**Q#04:** Match the columns.

**A**

Sum of four quarter turns

Take away 1 from 2 000

Least 2-digit number - Zero

Difference of 99 with itself

Sum of two quarter turns

**B**

Successor of 1 998

Least Whole number

One complete turn

One half turn

10

**Q#05:** Subtract 16 479 from 30 581.

(Do working on rough notebook)

**Solution:**

$$\begin{array}{r} 30581 \\ - 16479 \\ \hline \end{array}$$

The difference of 30 581 and 16 479 is a \_\_\_\_\_ - digit \_\_\_\_\_ whole number.
