

HOW TO OPERATE AIR FRYER

Order the following instructions in order to make logical sequence

Preheat: Preheat if needed, based on your manual.

Set Up: Clean all parts, place on a flat surface, and check the manual.

Set Cooking Time: Adjust time and temperature; cooking is usually faster than in regular ovens.

Clean the Air Fryer: Unplug, let it cool, then wash the basket and tray with soapy water; wipe down inside and outside with a damp cloth.

Remove Food: Use tongs or spatula carefully; wear oven mitts if needed.

Shake or Flip: Shake or flip food during cooking for even crisping, unless your model has 360° air circulation.

Prepare Food: Lightly oil and season food, avoid wet batter and leafy greens.

Select Settings: Choose the correct cooking mode (e.g., Air Fry, Roast).
