→ An animal that eats **both plants and animals**.

→ The way **plants make their own food** using **sunlight**, water, and air.

 *Plants use sunlight to turn air and water into sugar.*

→ Shows **who eats what** in nature.

 *Plants → insect → bird → snake*

→ A **group of the same kind of living things** living in the same place.

 *A lake can have a fish population.*

→ A living thing that **breaks down dead plants and animals**.

 *Like fungi and worms – they clean up nature!*

→ A living thing that **eats other living things** to get energy.

 *Animals are consumers—they eat plants or other animals.*

→ An animal that **only eats meat**.

→ An animal that **only eats plants**.

→ A living thing that **makes its own food**, like **plants**
