

GEOGEBRA 2D & 3D

CROSSWORD PUZZLE

DOWN

1. A 2D polygon with three sides.
2. A common command/action to draw a function or graph.
4. The line between two points — the shortest path joining them.
6. The vertical axis in a 2D coordinate plane.
9. The horizontal axis in GeoGebra's coordinate system.

ACROSS

3. A 3D box whose faces are rectangles (rectangular prism).
5. The command/tool used to find where two graphs or objects meet.
7. A flat 2D surface in 3D space (tool used to create surfaces).
8. A 3D shape you get by rotating a semicircle about its diameter.
10. The 3D axis that points out of / into the screen (third dimension).
