

OVERFISHING

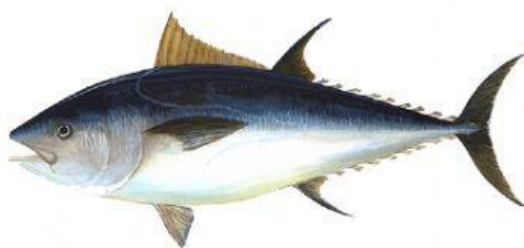

It occurs when _____ fish _____
animals and plants faster than they can _____.

It usually happens as a consequence of the rising of
_____ because we need more _____.

Overfishing reduces some species so much that they are endangered.

It drives other species to extinction.

Some of the most endangered species as a consequence of overfishing
are whales, red tuna and the Atlantic cod.

Choose the correct option:

People hunt whales because of their OIL / FINS
and red tuna and cod for FUN / COMMERCIAL
fishing (for markets and restaurants).

Watch this video about OVERFISHING and answer the questions.

1) What is overfishing?

It's fishing so _____ that the _____ don't have time to _____.
