**Relationship**

Read the text carefully, then match the definitions and vocabulary.

## Part 1: Read the text

I have two close friends, Sara and Miguel. We have already made friends since the first day of school, and we have kept in touch all the time. Being with close friends has just made my life easier and happier.

Of course, sometimes we have disagreed with someone about games or homework, but we haven't argued yet. We respect each other's opinions, and that helps us to get on very well.

This week, Sara has just texted me to plan the weekend. We have already met up twice this month, but we want to see each other again because we always have fun together.

At university, I have already tried to make friends with new classmates. It was difficult at first, but I have just got friends who share my interests. I haven't visited them at home yet, but I hope to do it soon.

I also have an old friend from my neighborhood. We haven't met for a long time, but we have already promised to see each other next holiday. Even though time passes, true friends always stay close.

## Part 2: Match the words with the meanings
