

Direct and Indirect

1. If the number of books on your list increases, the total time needed to read them also increases.
2. The faster you walk on the road, the less time you need to reach your destination.
3. If the weight of the luggage increases, the speed of carrying it becomes slower.
4. The slower you type on the computer, the longer the homework will take to finish.
5. If the number of buses on the road reduces, the crowd inside each bus becomes larger.
6. The more you practice solving problems, the fewer mistakes you are likely to make.
7. If the distance of a journey doubles, the petrol required also doubles.
8. The higher the marks you score in an exam, the greater the chance of receiving a prize.
10. If rainfall increases, the water level in the river also increases.
