III. READING

Exercise 1: Read the passage and choose the correct answer for each question.

Robots are like special machines that can do tasks without needing human help all the time. They are made by people and are programmed to do specific jobs. Some robots are like helpers at home because they can vacuum the floor or even mow the lawn. Others are used in factories to help make things like cars or phones faster and more accurately. There are also robots that help doctors with surgery, making procedures safer and more precise. With the help of robots, humans can do tasks that are too dangerous or boring for us. However, robots are not just about work. Some are designed to be fun, like robot toys or even pets that can respond to commands. But while robots can be really helpful, some people worry that they might take over jobs that people used to do, which is something we need to think about as we keep inventing new technology. Overall, robots are amazing inventions that can make our lives easier as long as we use them wisely.

Question 1: What are robots?

- A) Animals
- B) Special machines programmed to do tasks
- C) Trees
- D) Rocks

Question 2: What is one example of a task robots can do at home?

- A) Cook dinner
- B) Vacuum the floor
- C) Drive a car
- D) Paint a picture

Question 3: Where are robots used in factories?

- A) To play games

- B) To make things faster and more accurately
- C) To watch movies
- D) To take naps

Question 4: How do robots help doctors?

- A) By making appointments
- B) By cleaning the hospital
- C) By helping with surgery
- D) By delivering mail

Question 5: What is one concern some people have about robots?

- A) That they are too expensive
- B) That they are not helpful
- C) That they might take over jobs
- D) That they are too noisy

Exercise 2: Read the passage and decide if the sentence is True (T), False (F), or Not Given (NG).

Imagine a world far, far away, where the sky is a different color, and the ground feels like nothing you've ever stepped on before. This is what life might be like on another planet. Scientists have been studying planets beyond our solar system, called exoplanets, to learn more about what they're like. Some of these planets might have conditions that could support life, like the right temperature and atmosphere. On these distant worlds, creatures might look very different from anything we've ever seen. They could have extra eyes or legs, or maybe even wings to fly. Just like animals on Earth, they would need food, water, and shelter to survive. But life on another planet could also be very different from what we know. Maybe instead of breathing air, creatures there breathe something else, like gas or liquid. Exploring the possibility of life beyond Earth is an exciting journey that scientists are still working on. Who knows what amazing discoveries we might make about life in the universe!

Question 1: Scientists have discovered life on other planets beyond our solar system. _____

Question 2: Life on another planet could be very different from what we know. _____

Question 3: Exoplanets are planets within our solar system. _____

Question 4: Creatures on other planets might have similar appearances to animals on Earth. _____

Question 5: The conditions on some exoplanets could support life. _____

Question 6: Creatures on other planets would not need food, water, or shelter to survive. _____

Question 7: Creatures on other planets might breathe the same air as humans. _____

Question 8: Exploring the possibility of life beyond Earth is an ongoing journey for scientists.

Exercise 3: Read the passage and choose the correct answer for each question.

The Ba Na people live in Vietnam's Central Highlands. They have their own special culture. This includes their celebrations, like festivals, where they dance and wear colorful clothes. These festivals happen when important things like harvesting crops or getting married. The Ba Na people love nature and often do things connected to the land. They pass down their traditions from parents to children. Even though the world changes, they keep their customs alive. They believe it's important to keep their heritage strong. The Ba Na people are proud of who they are and where they come from. They show this by holding on to their traditions and sharing them with others.

Question 1: Where do the Bana people live?

- A) Coastal areas
- B) Mountains
- C) Cities
- D) Central Highlands

Question 2: What do the Bana people celebrate with festivals?

- A) Going to school

Question 4: What do the Bana people have a strong connection to?

- A) Cars
- B) Nature
- C) Computers
- D) Skyscrapers

Question 5: How do the Bana people pass down their traditions?

- A) By forgetting them
- B) By not talking about them
- C) By writing them down in books
- D) From parents to children

Exercise 4: Read the passage and choose the correct answer to complete each gap.

An astronaut living in space begins a day in much the same way as he would on Earth. The astronaut is able to brush his teeth and use the toilet in space. It is, however, rather challenging as the water droplets will (1) _____ around. The astronaut will also have to make to do with sponge baths.

There is a special plan for the astronaut on board (2) a _____ which includes beverages and food items. The astronaut is allowed to have a maximum of three main meals a day. The meal varies each day until the sixth day. On that day, the menu is (3) _____ and the astronaut eats the meals he had on the first day. The food that is brought on a shuttle mission can be dehydrated, in natural (4) _____ for fresh. Sometimes, they are kept in thermostabilized cans or sealed pouches. It takes only thirty minutes to cook a delicious meal for a crew of up to seven people on a space mission. However, astronauts have to eat slowly and (5) _____ or the food will float away.

Exercise 5: Read the passage and decide if the sentence is True (T), False (F), or Not Given (NG).

Sophia is a humanoid robot developed by Hong Kong-based company Hanson Robotics. She has been designed to learn and adapt to human behavior and work with humans, and has been interviewed around the world. In October 2017, she became a Saudi Arabian citizen, the first robot to receive citizenship of a country.

According to herself, Sophia was activated on April 19, 2015. She is modeled after actress Audrey Hepburn and is known for her human-like appearance and behavior compared to previous robotic variants. According to manufacturer, David Hanson, Sophia has artificial intelligence, visual data processing and facial recognition. Sophia also imitates human gestures and facial expressions and is able to answer certain questions and to make simple conversations on predefined topics (e.g. on the weather). The robot uses voice recognition technology from Alphabet Inc. (parent company of Google) and is designed to get smarter over time. Sophia's intelligence software is designed by SingularityNET. The AI program analyses conversations and extracts data that allows her to improve responses in the future. It is conceptually similar to the computer program ELIZA, which was one of the first attempts at simulating a human conversation.

Question 1: Sophia is a robot developed by a company called Hanson Robotics. ____

Question 2: Sophia was activated on April 19, 2015. ____

Question 3: Sophia has no ability to imitate human gestures or facial expressions. ____

Question 4: Sophia's intelligence software is designed by Google. ____

Question 5: Sophia has been interviewed only in her home country. ____

Question 6: Sophia's AI program is designed to analyze conversations and improve responses. ____

Question 7: Sophia received citizenship from a country other than Saudi Arabia. ____

Question 8: The AI program used by Sophia is completely unique and has no similarities to any other programs. ____

Exercise 5: Read the passage decide if the sentence is True (T), False (F)

Blackwater Middle School is proud to announce its yearly science fair. This year is our 22nd Science Fair! The science fair will be held on March 3 at the Blackwater Middle School gymnasium. Students are encouraged to either perform an experiment, invent something, or write a report. Topics can range from environmental science, such as how pollution can change the climate, to health science. If you are interested, please stop by the science lab to register. Students must receive permission from their parents before registering. The last day to register will be February 1. In addition, all experiments must be performed under adult supervision. It is also important to remember to practice safety first. Safety goggles and masks are available for rent at the science lab. Principal Hall will be judging all the experiments this year. The winning experiment will win a trip for four to Orlando, Florida. This is a great opportunity for some hands-on learning. Although students are not required to participate, it is recommended that they attend the fair on March 3. We hope to see everyone there!
