

## Science museums

Science museums are a great and \_\_\_\_\_ (afford) place to take your kids on a rainy Saturday afternoon. Your children can learn about science, technology and \_\_\_\_\_ (invent) in a fun and creative way. Take, for instance, the Science Museum in London; it has various \_\_\_\_\_ (fascinate) exhibits which are sure to leave your child \_\_\_\_\_ (amaze). And if your child has a dream of becoming a \_\_\_\_\_ (biology), why not go to the Biology Gallery where they can explore the interesting and \_\_\_\_\_ (impress) displays. In addition, the Science and Art of Medicine Gallery is both beautiful and \_\_\_\_\_ (education) as it uses objects to tell the history of medical traditions across the world. So, why not go to your local science museum this weekend? It will be \_\_\_\_\_ not to enjoy the experience.

## Upgrading the East End

No matter where in the world you are, you can be sure that \_\_\_\_\_ (inhabit) of big cities enjoy the splashes of bright colour that nature adds to their often grey and \_\_\_\_\_ (dirt) streets. Many local councils are nowadays \_\_\_\_\_ (courage) schemes to improve the environment in which people live and work. For example, the East End of London, an area which used to be full of factories and industrial \_\_\_\_\_ (pollute), is being cleaned and improved by planting thousands of flowers and fruit trees. Local schools are enthusiastic \_\_\_\_\_ (participate) and, at the moment, are involved in putting two huge schemes into practice. The first one is to flower beds inside old factories, from which machinery has been remove. The second activity will be to introduce apple and cherry trees to a rather \_\_\_\_\_ (please) toxic waste area. Of course, city life cannot be \_\_\_\_\_ (complete) changed but it can certainly be made greener and \_\_\_\_\_ (healthy).
