## STRUKTUR JARINGAN TUMBUHAN

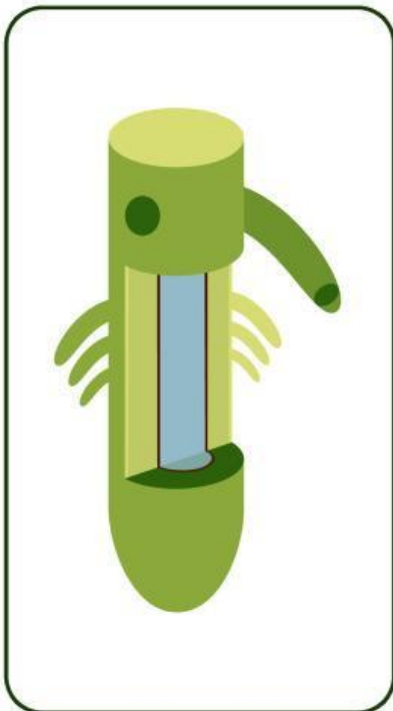

Tuliskan kandungan dan fungsi bagian struktur jaringan tumbuhan sesuai gambar berikut!

**Nama Bagian: Ujung Batang**

Kandungan:

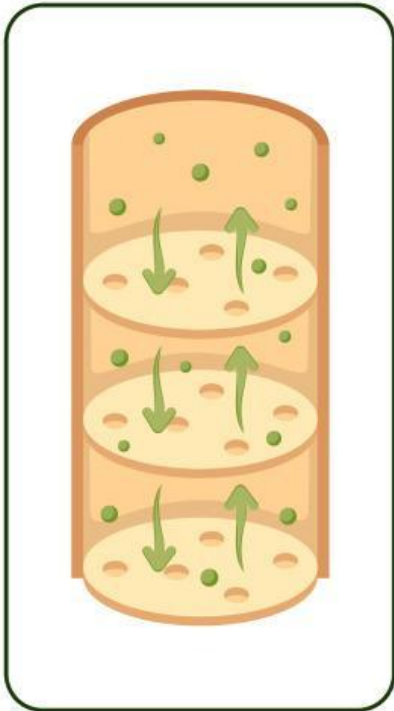

Fungsi Bagian:

**Nama Bagian: Ujung Akar**

Kandungan:

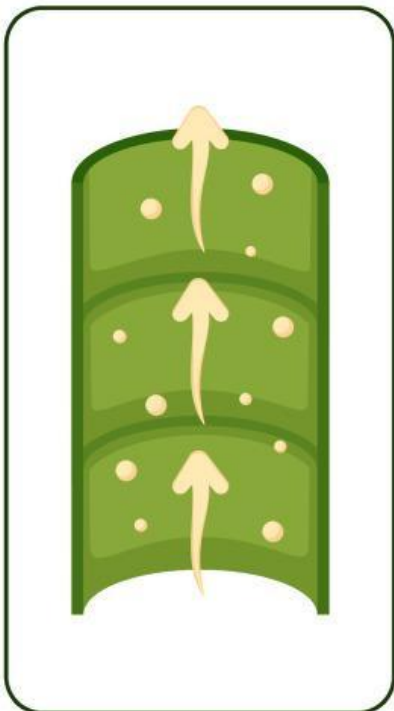

Fungsi Bagian:

**Nama Bagian: Floem**

Kandungan:

Fungsi Bagian:

**Nama Bagian: Xilem**

Kandungan:

Fungsi Bagian:

Isilah Tabel dibawah ini!

| No | Macam Jaringan                            | Karakteristik | Lokasi | Fungsi |
|----|---|---------------|--------|--------|
| 1  | <b>Jaringan Pelindung</b>                 |               |        |        |
|    |   |               |        |        |
|    |   |               |        |        |
|    |   |               |        |        |
| 2  | <b>Jaringan Parenkim</b>                  |               |        |        |
|    |   |               |        |        |
|    |   |               |        |        |
|    |   |               |        |        |
| 3  | <b>Jaringan Penguat:</b><br>a. Sklerenkim |               |        |        |
|    |   |               |        |        |
|    |   |               |        |        |
|    | b. Kolenkim                               |               |        |        |
|    |   |               |        |        |
|    |   |               |        |        |
| 4  | <b>J. Pengangkut:</b><br>a. Floem         |               |        |        |
|    |   |               |        |        |
|    | b. Xilem                                  |               |        |        |
|    |   |               |        |        |
