

At the hospital reading comprehension

Maria is a nurse. She is very kind and patient. Today is October 4, 2025. It is a busy day at the hospital. Maria is in Room 12 with a new patient.

The patient is a man. His name is Carlos. He is 25 years old. Carlos is a student of physical rehabilitation. He has two feet, but one foot is hurt. It is the left foot. Carlos is nervous, but he is also brave.

Maria says: "Sit down, please! Don't move! Show me your arm." Carlos listens and follows the instructions. Maria is happy. She says: "Good job! Open your mouth. Take a deep breath. Don't worry."

After a few minutes, Maria calls for help. She says: "Two doctors, please come here!" The doctors arrive quickly. They are very friendly. One doctor is a man, and one doctor is a woman. They are both 35 years old.

The doctors look at Carlos. They say: "Don't walk now. Rest in bed. Use the crutches. Drink water. Take this medicine."

Carlos is tired, but he is also thankful. He says: "Thank you, nurse. Thank you, doctors."

The doctors smile and say: "See you again next week. Today is October 4, but come back on October 11, 2025."

Maria writes the date in the calendar. She says: "Rest, Carlos. Don't forget your medicine. Wash your hands. Wear a mask."

Carlos smiles. He is ready to go home.
