

MIX AND MATCH

Sara has two wardrobes. The first wardrobe is used to store her clothes. While the second wardrobe is used to store pants and skirts. She wants to attend her friend's birthday party. There are 2 types of shirts and 2 types of new pants and skirts that she has bought. Help her to match the most suitable clothes for her to style.

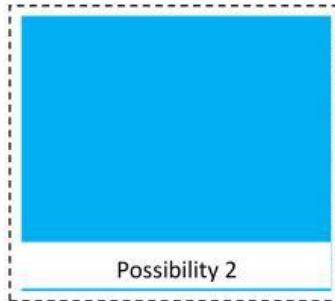

State all the possible pairs of clothes that Sara can wear. Drag the apparel from the first wardrobe and then match it with another apparel from the second wardrobe.
