

POLLINATION

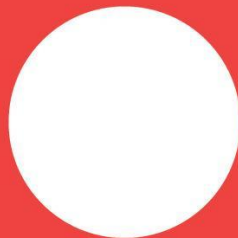

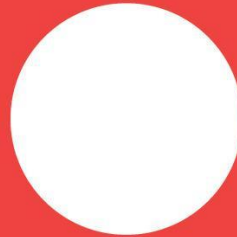

How flowers and bees work together!

Drag the images and the text into their right place

ARRIVE

Bees arrive at the flower, ready to collect **sweet pollen** and help it grow.

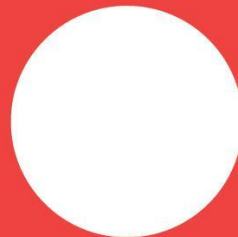

STICK

Pollen sticks to the bee, making it easy to **carry to another flower** for pollination.

ATTRACT

Flowers attract **bees with bright colors** and sweet scents to help them grow.

HELP OUR FLOWERS!

Plant flowers and watch the **bees come to visit!**
