# URINARY SYSTEM

1) Label the urinary system:

2) Complete the following statements with the right answer.

- Blood flows to each kidney through the \_\_\_\_\_.
- Inside the kidney, the blood is \_\_\_\_\_ and the urine is formed from excess \_\_\_\_\_, excess \_\_\_\_\_ and \_\_\_\_\_ brought by the blood.
- The two \_\_\_\_\_ drain the urine to the bladder where it accumulates. When the bladder fills, the urine will be evacuated \_\_\_\_\_ the body through the \_\_\_\_\_.
- Blood leaves the kidneys through the \_\_\_\_\_.

3) **Indicate** the path of urine from its formation to its evacuation. Drag the words from the box.

Bladder – ureters – urethra – kidneys

\_\_\_\_\_ → \_\_\_\_\_ → \_\_\_\_\_ → \_\_\_\_\_

4) **Match** each organ of the urinary system to its role.

Kidney •

• place where urine accumulates

Ureter •

• filters the blood and is the place where urine is formed

Bladder •

• drains urine outside the body

Urethra •

• conducts urine to the bladder

Be Healthy to keep

your Kidneys Healthy
