#### II. Read and choose the correct answers. (Đọc và chọn đáp án đúng.)

Exploring Shapes    
 

Shapes are all around us! Every day, we see different shapes in the world. Let's learn about some common shapes. A circle is round and it has no corners. You can find circles in things like wheels, coins, and basketballs. A circle is a shape that goes around and around. A triangle has three sides and three corners. You can see triangles in things like a slice of pizza, a

birthday hat, and the roof of a house. Some triangles are tall, while others are short. A rectangle has 2 long sides and 2 short sides. It also has four corners. You can find rectangles in books, doors, and tables. A square is a **special** kind of rectangle where all four sides are the same length. You can see squares in chess boards, windows, and many tiles. Shapes help us **understand** the world around us. Next time you go outside, look for these shapes in your surroundings!
