

The image shows a screenshot of the Microsoft Excel ribbon, specifically the 'Home' tab. A red circle highlights the font settings area, which includes the font face (Calibri), font size (11), and font color (A). Below the ribbon, there are several empty rectangular boxes with green borders, each connected by a line to a specific feature in the ribbon. The connections are as follows:

- A box in row 3, column B is connected to the 'Format Painter' icon.
- A box in row 4, column B is connected to the 'Bold' (B) button.
- A box in row 4, column C is connected to the 'Italic' (I) button.
- A box in row 5, column C is connected to the 'Underline' (U) button.
- A box in row 6, column D is connected to the 'Background Color' icon (a paint bucket).
- A box in row 6, column E is connected to the 'Font Color' icon (an 'A' with a color bar).
- A box in row 7, column F is connected to the 'Border' icon (a grid).

At the bottom of the image, there are seven labels in green-bordered boxes: 'Italic', 'underline', 'Bold', 'Background Color', 'Font Color', 'Format Painter', and 'Border'. These labels correspond to the features indicated by the lines from the worksheet boxes.
