

**TABLE 7.1. CRANIOMETRIC POINTS OF CRANIUM**

Landmark	Shape and Location
	Junction of greater wing of sphenoid, squamous temporal, frontal, and parietal bones; overlies course of anterior division of middle meningeal artery
	Point on calvaria at junction of lambdoid and sagittal sutures
	Point on calvaria at junction of coronal and sagittal sutures
	Superior point of neurocranium, in middle with cranium oriented in anatomical (orbitomeatal or Frankfort) plane
	Star shaped; located at junction of three sutures: parietomastoid, occipitomastoid, and lambdoid
	Smooth prominence; most marked in males; on frontal bones superior to root of nose; most anterior projecting part of forehead
	Most prominent point of external occipital protuberance
	Point on cranium where frontonasal and internasal sutures meet
