Reading Part 3

- For each question, choose the correct answer.

In 1969, three people in a tiny spaceship made history with a trip the world will never forget. The three men were Michael Collins, Edwin "Buzz" Aldrin, and Neil Armstrong. The first manned lunar landing mission was called Apollo 11 and their destination was the moon. Tens of thousands of people worked on the Apollo project to send those men to the moon. The project, also known as Apollo program, took 10 years of preparation. The first manned Apollo flight was a disaster because the spacecraft caught fire on the ground. But NASA continued with the Apollo program. During future space missions, the astronauts practiced flying their space crafts. They also performed the tasks they needed to know so they were able to fly to the moon and land on it. On the Apollo 8 mission, the astronauts flew around the Moon ten times. They were almost ready for the first moon landing. The rocket that carried the spacecraft and the astronauts into orbit around the moon was called the Saturn 5. It blasted through space at a speed of at least 25,000 miles an hour. Even at that speed, it took 3 days, 3 hours and 49 minutes to reach the moon. The Apollo 11 mission used a special lunar module designed only for landing on the Moon. It was called the "Eagle". On July 20, 1969, the Eagle landed on the Moon's desolate surface. Only two astronauts actually stepped on the moon that day. Neil Armstrong became the first person to walk on the moon. Edwin "Buzz" Aldrin followed about twenty minutes later. The astronauts set up a TV camera, and the whole world watched the landing on TV. Michael Collins waited for them in the spacecraft and orbited the moon. It was his job to take care of the spacecraft that would take them all home. He had to make certain nothing happened to it!

April Fools' Day

The first day of April is known in England as April Fools' Day or All Fools' Day. The idea is to play tricks with other people, to try to make them believe things that are completely untrue. 1) Although most of the tricks are far from original or have been used for a long time, they succeed again and again.

The simplest jokes can involve children who tell each other that their shoelaces are undone. 2) Sometimes people are told that their jackets have been torn or they are sent on a false business errand. 3) They produce sensational news on television, radio as well as in the press. 4) Those who continue to play jokes in the afternoon are April fools themselves.

Several theories have been put forward about how the tradition began. 5) So the origin of the "custom of making April Fools" remains uncertain and unknown.

A) Children stick paper fish to their friends' backs.

B) The media also join in.

C) April Fools' Day is not a national holiday.

D) Both children and adults play all kinds of practical jokes then.

E) Why do we do this, and where did it start?

F) Unfortunately, none of them are very interesting.

G) Then they cry out "April Fool!" when the victims glance at their feet.

H) In the UK the jokes and pranks should stop by noon.
