TRS501 – Earth Science – Vocabulary review

1. The price of vegetables can _____ depending on the season.
   a. block
   b. fluctuate
   c. thaw
   d. decline
2. The doctor checked the damaged _____ after the accident.
   a. tissues
   b. volume
   c. output
   d. displacement
3. The factory increased its daily _____ to meet rising demand.
   a. saturation
   b. output
   c. thaw
   d. evaporate
4. There is a high _____ of plastic in the river.
   a. capacity
   b. concentration
   c. biodiversity
   d. model
5. A fallen tree can _____ the road during a storm.
   a. block
   b. trigger
   c. saturate
   d. expand
6. Scientists built a _____ to study climate change effects.
   a. model
   b. mammal
   c. tissue
   d. thaw
7. The storm caused _____ damage to houses near the sea.
   a. massive
   b. thermal
   c. relevant
   d. adverse
8. The speaker raised the _____ of her voice so everyone could hear.
   a. volume
   b. displacement
   c. capacity
   d. thaw
9. The fire produced a lot of _____ heat.
   a. intense
   b. thermal

LIVEWORKSHEETS

c. vulnerable
d. consequential

10. Hot air makes metal _____ slightly.
    a. expand
    b. evaporate
    c. fluctuate
    d. decline
11. Scientists warn that rising temperatures may _____ melting in the Arctic.
    a. accelerate
    b. block
    c. saturate
    d. relocate
12. Frozen food will _____ quickly if left outside.
    a. thaw
    b. trigger
    c. expand
    d. evaporate
13. Many families had to _____ after the flood destroyed their homes.
    a. relocate
    b. decline
    c. fluctuate
    d. saturate
14. The earthquake caused the _____ of thousands of people.
    a. displacement
    b. concentration
    c. tissues
    d. capacity
15. Many animals face _____ due to habitat loss.
    a. extinction
    b. output
    c. model
    d. thaw
16. Only _____ data should be included in the final report.
    a. relevant
    b. saturated
    c. vulnerable
    d. thermal
17. Protecting forests helps preserve the planet's _____.
    a. biodiversity
    b. evaporation
    c. concentration
    d. capacity
18. The heat was so _____ that people had to stay indoors.
    a. intense
    b. adverse

LIVEWORKSHEETS

c. uninhabitable
d. consequential

19. Without water, a desert becomes _____ for most animals.
    a. uninhabitable
    b. thermal
    c. saturated
    d. block
20. The loss of ice will have _____ effects on coastal cities.
    a. consequential
    b. massive
    c. thawed
    d. vulnerable
21. A whale is the largest _____ in the ocean.
    a. mammal
    b. model
    c. tissue
    d. trigger
22. Scientists worry about the sharp _____ in bee populations.
    a. decline
    b. thaw
    c. displacement
    d. concentration
23. Too much work can have an _____ effect on your health.
    a. adverse
    b. intense
    c. relevant
    d. saturated
24. This bottle has the _____ to hold two liters of water.
    a. capacity
    b. displacement
    c. thermal
    d. biodiversity
25. High temperatures increase the _____ of water into the air.
    a. evaporation
    b. saturation
    c. decline
    d. output
26. Cutting down trees can _____ climate problems.
    a. exacerbate
    b. thaw
    c. fluctuate
    d. block
27. Heavy rain will _____ the soil and cause flooding.
    a. saturate
    b. decline

LIVEWORKSHEETS

c. trigger
d. accelerate

28. Strong winds may _____ wildfires in dry areas.
    a. trigger
    b. relocate
    c. thaw
    d. evaporate
29. Small animals are more _____ to cold weather.
    a. vulnerable
    b. massive
    c. thermal
    d. consequential
