Reading Part 4

Read the text about an artist. For questions 1–4 choose the correct answer A, B, C or D.

A Different Kind Of Art

Artist Adrian Gray is an unusual kind of artist. He makes shapes by balancing stones. He first discovered stone balancing when he was making sculptures out of stone on a beach one day. He accidentally balanced one stone on another in what seemed an impossible way.

Adrian has always been interested in stones. He was born in Bristol in the south of England. He studied geology and spent a long time travelling, studying and photographing stones in places like the Himalayas and around the Pacific.

A tropical illness caused him to stop travelling and to settle back in Britain. He chose to live in a small seaside town and began to develop his art of stone balancing.

Adrian displays his art for local people and visitors to see. Most of the people who see Adrian's work are amazed.

They cannot believe that it's possible to balance rocks on such a small point of contact. They often believe that he's using glue or magnets of some kind. So, how do the stones balance? It seems that it's all to do with physics. Gravity and friction cause the stones to stay in place.

Adrian's works of art take different lengths of time to complete. Some can take a few seconds or minutes while others take days. Of course Adrian's works do not last long. A gust of wind, a wave or a downfall of rain can cause the stones to suddenly fall. That's why he has a camera set up at all times so that he can take photos of his work before it disappears. Adrian sells these photos to make a living. He also works as a stonemason and a roofer, and makes bird tables and chests out of driftwood.

Writing

Part 3

- 1 Read the task below and Isabella's letter. Which piece of information does she leave out?

This is part of a letter you receive from an English penfriend.

In your next letter, please tell me about a film you've seen recently. What's it about? Who plays the main character? What's your favourite part of the film?

Now write a letter answering your penfriend's questions.

Dear Anna

Thanks for your letter. You asked me about a film I saw recently. I went to see the comedy *Night at the Museum 2* last week.

The film is about a museum where the exhibits come to life at night. In the first film the hero, Larry Daley, who is played by Ben Stiller, is a security man at the museum. In this film he has a different job, but he returns to help his friends when they are in trouble.

You should watch the film because it's funny, although it isn't as good as the first one.

See you soon!

Isabella

- 2 Write your own answer to the task in exercise 1. Write about 100 words.
