Mark the letter A, B, C or D on your answer sheet to indicate the best arrangement of utterances or sentences to make a meaningful exchange or text in each of the following questions.

Global warming means that the Earth's average temperature is rising, (1)_____. When we burn these fuels, gases known as greenhouse gases, including carbon dioxide and methane, which trap heat from the sun and make the Earth warmer. This process, called the greenhouse effect, leads to a rise in global temperatures.

The problem started during the Industrial Revolution when coal became an important energy source. Since then, the use of fossil fuels has increased a lot, especially in the last 100 years. (2)_____, making global warming worse.

Global warming causes climate change, which means changes in weather like more droughts, storms, and floods.(3)_____. The warming ocean causes ice to melt and sea levels to rise, (4).

To help stop global warming, people need to use less fossil fuels and switch to cleaner energy like wind or solar power. Protecting nature and saving energy are important ways (5)_____.

Question 1:

- A.caused mostly by human activities like burning fossil fuels such as coal, oil, and natural gas.
- B.which is mostly causing by human activities like burning fossil fuels such as coal, oil, and natural gas.
- C.that is mostly caused by human activities like burning fossil fuels such as coal, oil, and natural gas.
- D.which mostly human activities like burning fossil fuels such as coal, oil, and natural gas.

Question 2:

- A. Scientists have found ways to stop the emission of all greenhouse gases completely
- B. This has caused more greenhouse gases to enter the atmosphere
- C. Governments worldwide have succeeded in reducing the use of coal and oil
- D. The consumption of non-renewable energy sources has been decrease significantly

Question 3:

- A. However, carbon emissions have been successfully reduced by governments
- B. The economic impact of climate change has decreased recently.
- C. It also harms animals and plants because they must move or they might die soon.
- D. These changes in weather and temperatures affects all plants and animals quickly

Question 4:

- A. leading to flooding in some areas.
- B. that leads to flooding in some areas.
- C. and it is led to flooding in some areas.
- D. which it leads to flooding in some areas.

Question 5:

- A. that scientists use to measure changes in ocean temperatures accurately.
- B. for governments to deny the severity of climate change to save money.
- C. to reduce the damage and protect our planet for the future.
- D. to increase the world's dependence on traditional, non-renewable energy sources.
