

Task.

Technical Reading & Verb TO BE

Part 1 – Reading

Jack works as a mechanical engineer at Latin Equipment. Today, he is in the workshop because one of the loaders is not working properly. The hydraulic system is very noisy, and there is a small oil leak near the main hose. Jack is checking the filter and the hydraulic pump to identify the problem. He thinks the hose is old and needs replacement. A technician is helping him with the inspection. They are preparing a report for the customer.
