magical

# Analytical Exposition

Write T for True and F for False

## Global Economy Improves Country Development

The global economy plays an important role in helping countries grow. First, international trade allows countries to sell their products to other nations. When a country earns more money from exports, it can improve its industries.

Second, global investment brings new technology and job opportunities. Foreign companies help local workers learn new skills. Lastly, participation in the global economy encourages innovation and competition. This makes products better and cheaper for consumers.

Therefore, joining the global economy gives many benefits for a country's economic development.

1. Global economy has no effect on a country's growth.

---

2. International trade can increase a country's income.

---

3. Global investment can create new jobs.

---

4. Competition makes products worse and more expensive

---
