

## Reading & Comprehension

David was always a smart and curious kid. His grandfather was a science teacher, and explained to him many things about space, the planets and the moon since he was very young.

That was decisive for him, when he had to fill out the form to choose what course to take at the university. Maybe an astronomer or a science teacher, he wouldn't bother, since his profession was connected to his passion, the universe.

1. David's grandfather was

a) a science teacher.

b) an astronomer.

c) a university professor.

2. David started learning about the universe

a) when he was a teenager.
