5. **F** **s** are often stories about animals which explain something about life.

II. Read the text and choose the correct answers.

Taking Care of Your Amazing Brain!

Did you know that your brain is one of the most important organs in your body? It helps you think, learn, and remember things! To keep your brain healthy, you need to take good care of it, just like you would take care of your heart or your muscles. Here are some easy ways to make sure your brain stays strong and healthy:

Eat Healthy Foods: Eating a balanced diet is essential for brain health. Foods like fruits, vegetables, whole grains, and fish provide the nutrients your brain needs. For example, fish like salmon are full of Omega-3 fatty acids, which help your brain work better.

Get Plenty of Sleep: Sleep is important for everyone, especially for your brain. When you sleep, your brain gets a chance to rest and recover. Aim for 9 - 11 hours of sleep each night to help you feel alert and ready to learn during the day.

Stay Active: Just like your body needs exercise, so does your brain! Playing outside, riding your bike, or joining a sports team can help improve your mood and make you feel happier. Physical activity also helps your brain grow new cells!

Challenge Your Mind: Keep your brain sharp by trying new things. Read books, solve puzzles, or learn a new skill, such as playing a musical instrument. These activities can improve your memory and creativity.

Stay Social: Spending time with friends and family can boost your brain health. Having conversations and sharing laughter help your brain stay active and engaged.

Protect Your Head: When riding a bike or playing sports, always wear a helmet. Protecting your head from injury is crucial for keeping your brain healthy.

By following these simple tips, you can take great care of your brain and enjoy learning and having fun every day! Remember, a healthy brain is a happy brain!

0. What does your brain help you do?

☒ A. It helps you think, learn, and remember things.
