

**Numbers:** Write the numbers in letters

Remember: When writing large numbers, *divide* them *in groups of three*. For every 3<sup>rd</sup> number from the right, you need to write “hundred”, **IF IT’S NOT ZERO**. 1st point (←) = “thousand”, 2<sup>nd</sup> = million, 3<sup>rd</sup> = billion ...

Example: 345.298.678.123 =

**THREE HUNDRED** forty five billion **TWO HUNDRED** ninety eight million

**SIX HUNDRED** seventy eight thousand **ONE HUNDRED** twenty three.
