How to learn a new language with native speakers on Hi-Hola

The best way to become fluent in a language is to speak it. Hi-Hola is a language exchange app that will let you chat with native speakers of the language you're learning.

Step 1: _____

Download the app and follow the steps to create an account. You can choose up to two languages to learn in the free version.

Step 2: _____

- The app will show you people whose language pair matches yours. For example, if you're a Vietnamese speaker who's learning English, it'll show you English speakers who are learning Vietnamese.
- Tap on their profiles to see more information and send them a friend request. You can only talk to people who accept your friend requests.

Step 3: _____

When you talk with a friend, tap a message to use these functions:

1. Correct: correct any mistakes that your friend makes
2. Translate: translate your friend's message
3. Listen: listen to how it's said

Step 4: _____

- Tap on the *Moments* tab and tap on the pen icon to share an update. Here you can ask questions, share pictures, or videos.
- When you share a post, all the native speakers of the language you're learning will be able to see and comment on it. They can help you fix spelling and grammar mistakes in your post.

You can now practice with native speakers!
