**Read the text. Circle True or False**

**Cheetahs and Lions**

The cheetah and lions are big cats that live in Africa. Both animals are predators. That means that if they see prey, they hunt the prey for food. The lion is not as fast as the cheetah, but it is bigger and stronger than the cheetah. The cheetah uses its spots for camouflage. The lion does not have any spots. The lion is as good as the cheetah at attacking its prey. Both cheetahs and lions live for about 10-20 years.

*Example: Both the lion and the cheetah live in Africa.*
