## C Read and complete.

I'm Sarah, and I'm in class 5G at Greenfield Elementary School. This is my class. Today, we learned about jobs in the future. I think many people will be engineers because we will need many robots in factories and our houses. Engineers will help us make these robots. I also think many people will be astronauts in the future. My teacher often says that people will want to know more about space. Astronauts will travel in space and answer our questions about life on other planets. I think the future will be very cool.
