

Areas of Simple Shapes

Use the appropriate Formula to Calculate the Areas that follow

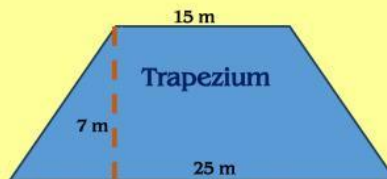

Areas of Parallelograms = Width times Perpendicular Height

Areas of Triangles = Base times Perpendicular Height divided by Two

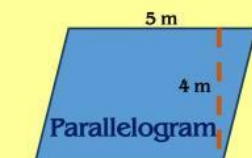

Areas of Trapeziums = (Sum of Parallel Sides) times Perpendicular Height divided by Two

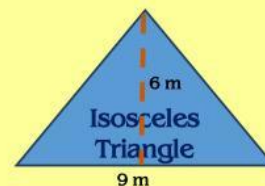

Area = _____ m²

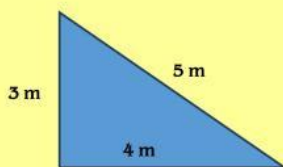

Area = _____ m²

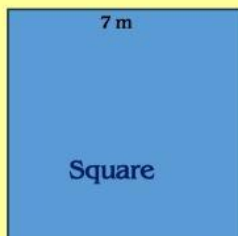

Area = _____ m²

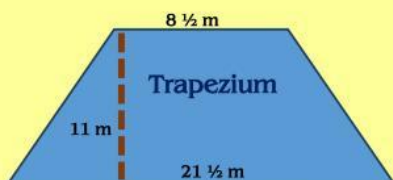

Area = _____ m²

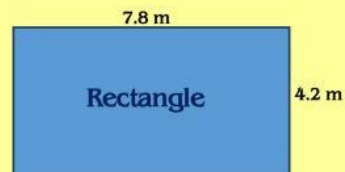

Area = _____ m²

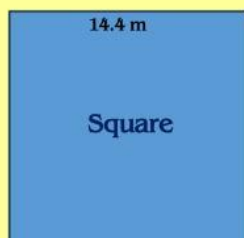

Area = _____ m²

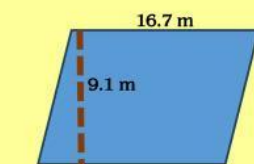

Area = _____ m²

Area = _____ m²

Area = _____ m²

Area = _____ m²
