

## Homework Worksheet

Topic: Animals, Biology & Environment (B1)

### 1. Match the words with their meanings

1. eagle
2. herbivore
3. territory
4. incubation
5. echolocation
6. captivity
7. species
8. fluke

- A. the wide tail of a whale or dolphin
- B. living under human control
- C. an animal that eats only plants
- D. the time when eggs are kept warm
- E. a large bird that hunts other animals
- F. using sound to find objects
- G. an area an animal protects
- H. a group of animals of the same type

### 2. Choose the correct option

1. Dolphins communicate (at distances / on distances).
2. Many animals suffer when they live (in danger / in captivity).
3. Bats use (echolocation / incubation) to hunt at night.
4. A golden eagle protects its (territory / species).
5. Baby dolphins feed (on / off) their mother's milk.
6. Scientists study animal (behaviour / fluke) in the wild.
7. Eagles can (soar / release) in the sky.
8. This species is (in danger / in captivity).

### 3. Complete the sentences

1. The female bird stays on the nest during the \_\_\_\_\_ period. (incubate)
2. Bats \_\_\_\_\_ using sound waves in the dark. (hunt / echolocation)
3. Lions are \_\_\_\_\_, so they eat meat. (carnivore)
4. Scientists \_\_\_\_\_ animals by species. (classify)
5. Dolphins were \_\_\_\_\_ back into the ocean. (release)

### 4. Error correction

1. Dolphins use echolocation to see in the dark.
2. Eagles are herbivores and eat plants.
3. Many species are danger because of pollution.
4. The sound bounced on the object and came back.
5. Animals in captivity live in their natural habitat.

### 5. Short writing

Write 5–6 sentences about one animal you find interesting. Use at least five words from the topic vocabulary.

## 6. Self-reflection

- ✓ I understand most of the words
- ✓ I can use the words in sentences
- ✓ Some words are still confusing

One word I remember best: \_\_\_\_\_

One word I want to practise more: \_\_\_\_\_
