

MTSS Learning Activity

For this simulation we are going to use Oral Reading Fluency (ORF) as our Progress Monitoring Measure. ORF is a Curriculum Based Measure and a Robust Indicator of Reading. To do this task we will look at the DIBELS ORF measure for 3rd grade students. DIBELS uses grade normed passages read for one minute each.

At your school site the special education teacher collaborates with the general education teacher to identify students needing Tier 2 or Tier 3 intervention. The special education teacher then works with the reading team to provide Tier 2 and Tier 3 support. **The reading team only has the resources to support 4-5 students in Tier 2 and only 2-3 students in Tier 3.**

Students receive the ORF assessments at 4 times during the year. Based on National Data here are typical goal scores. The biggest goal is that you want all 3rd grade students to be reading at 110 wpm in June.

Month	August	November	March	June
ORF Goal	67	77	92	110

You will receive sets of data for August, November, and March. Using the data decide which students you would like to include in Tier 2 and 3 instruction.

	Tier 2 4-5 students	Tier 3 2-3 Students
August		
November		
March		

MTSS Learning Activity

Name	August Score
Miguel	62
Ana	53
Giselle	58
Rachel	73
Siena	68
Leo	70
Michael	78
