

Simple network

Task 1

The diagram below shows some common components for a network linked to the Internet.

- 1 Label each component (see the word bank below).
- 2 Write 'user' by any device that a network user would use.
- 3 Write 'information' next to any device that transmits information around the workplace and to the Internet.

Word bank

Mobile	Laptop	File server	Internet	Printer	Scanner
Desktop	Switch	Router	Wireless hub		

Task 2

Match the words to the description (draw a line between each).

Desktop	to work on files (wired connection)
Laptop	connects wireless devices to the network
Mobile	connect the network to the Internet
Switch	to work on files (probably a wireless connection)
File server	to connect computers to other devices in the network
Wireless hub	scan in images and documents to save or work on
Router	make paper copies of files
Printer	stores programs and files, checks users are authorised (students' work is saved on a file server)
Scanner	to make calls, send and receive messages/emails, browse the web
