Incredible Inventions

Scientists create many amazing inventions to make our lives easier. Long ago, there was no electricity, but today we use it every day.

A computer is a great machine. Computers help us play games and do homework. Another important invention is the phone. Phones help people call their friends and family from far away. Cars are also very useful. They help us travel from place to place quickly. Finally, think about lights. Lights help people see at night when it is dark. Inventions change the way we live in a wonderful way.
